A

Accreditation, unannounced JCAHO survey, (1):5

Acute care

in-hospital falls, (2):128

restraint reduction, (3):253

African American women, rural, descriptions of mammogram quality, (3):231

Age/Aging. *See* Geriatric population

Agency for Healthcare Research and Quality

patient safety in nursing practice, (3):193

web site for patient safety, (4):374

Alcohol abuse, (4):297

Alcohol withdrawal protocol, (4):297

Alcohol withdrawal syndrome, symptom-triggered therapy, (4):297

Alternatives, restraint reduction, (3):253

Ambulatory surgery, patient anxiety and satisfaction, (3):238

Analgesia, sedation and analgesia scale, (1):13

Anxiety, patient anxiety in ambulatory surgery centers, (3):238

APACHE, quality management collaborative initiative, (2):174

Arterial blood gas, harmonization of practice among caregiver groups, (4):327

Assisted living facilities, transfer to skilled nursing facilities, (1):16

Autonomy, work environment factors and retention of nurses, (3):283

B

Best practice guidelines, client-centered care, Therapeutic Touch, (1):90

Blood glucose, effects of Internet-based intervention on plasma glucose in type 2 diabetes, (4):335

Blood pressure, hostility and spirituality and, (1):81

Braden Scale, nosocomial pressure ulcer rates in critical care, (1):56

C

Cancer pain, pain management program, (3):261

Cancer screening

disparities in, (2):99

rural African American women's descriptions of mammogram quality, (3):231

Cardiac health, hostility and spirituality and, (1):81

Cardiac rehabilitation, quality of life, (2):161

CareMaps, quality management collaborative initiative, (2):174

Care planning, outcome-based multidisciplinary care planning tool, (2):145

Care satisfaction, effects of Internet-based intervention on plasma glucose in type 2 diabetes, (4):335

Case management, syncope, (2):140

Catheterization, intermittent, for neurogenic bladder, (4):302

Cellular phone, effects of Internet-based intervention on plasma glucose in type 2 diabetes, (4):335

Chart Audit Analysis Tool, pain management by direct care nurses, (2):167

Client-centered care, Therapeutic Touch, (1):90

Collaboration

consistent quality care to address disparities in cancer screening, (2):99

more quality bang for your healthcare buck, (2):174

Communication

effects of Internet-based intervention on plasma glucose in type 2 diabetes, (4):335

nurses' perceptions of open visiting hours in neuroscience ICU, (2):182

nursing homes' capacity to create and sustain improvement, (1):36

nursing homes' capacity to create sustainable improvement, (3):203

Competing Values Framework Organization Assessment, organizational culture in nursing home setting, (4):341

Consistency of care, healthcare disparities, (2):99

Consumer Emergency Care Satisfaction Scale, (4):364

Continuing education

delirium, (3):244

evidence-based approach to fall risk assessment, prevention, and management, (2):107

patient education and health-related quality of life, (4):307

your patient–my child: priorities for improving pediatric care from parent's perspective, (1):43

Continuity of care, healthcare disparities, (2):99

Continuous lateral rotational therapy, outcomes, (3):273

Convergent validity, Consumer Emergency Care Satisfaction Scale, (4):364

Coronary artery bypass graft, preoperative mental status and postoperative complications, (1):73

Cultural change, healthcare disparities, (2):99

D

Delirium, medications and, (3):244

Dementia, admission to skilled nursing facilities from assisted living facilities, (1):16

Diabetes mellitus, type 2

impact of Internet-based educational intervention, (4):335

nurse care coordination, (3):208

nurse-coordinated intervention, (2):154

Drugs, delirium and, (3):244

E

Economic issues

case management program for syncope, (2):140

more quality bang for your healthcare buck, (2):174

Emergency department, patient satisfaction, (4):364

Environment

occupational health hazards, (4):356

work environment factors and retention of nurses, (3):283

Evidence-based practice

alcohol withdrawal protocol, (4):297

client-centered care, Therapeutic Touch, (1):90

consistent quality care to address disparities in cancer screening, (2):99

fall risk assessment, prevention, and management, (2):107

intermittent catheterization in neurogenic bladder, (4):302

nurse care coordination for diabetes, (3):208

sedation and analgesia scale, (1):13

F

Fall risk screener, in-hospital falls, (2):128

Falls/falling

in hospital, (2):128

risk assessment, prevention, and management, (2):107

Family-centered care, priorities for improving pediatric care from parent's perspective, (1):43

G

Geriatric population

admission to skilled nursing facilities from assisted living facilities, (1):16

delirium and medications, (3):244

hospital readmission from transitional care unit, (1):26

preoperative state of mind and postoperative complications, (1):73

TigerPlace, (1):1

Glycosylated hemoglobin, nurse-coordinated intervention for type 2 diabetes, (2):154

Griffin, Frances A., (4):369

Guidelines, harmonization of practice among caregiver groups, (4):327

H

Healthcare delivery, harmonization of practices, (4):327

Healthcare disparities, in cancer screening, (2):99

Health promotion, hostility, spirituality, and cardiac health risk, (1):81

Hispanic Americans, hostility, spirituality, and cardiac health risk, (1):81

Historical perspective, nursing shortage; "If we only had a nurse," (2):190

Home healthcare, improving wound care outcomes, (4):349

Hospitalization

hospital readmission from a transitional care unit, (1):26

length of stay. *See* Length of stay

Hostility, cardiac health risk, (1):81

Hypertension, hostility and spirituality and, (1):81

I

Infection, occupational tuberculosis, (4):356

Infection control, improving wound care outcomes in home setting, (4):349

Injury, fall-related, (2):107

Inservice training, plan, do, study, act model to improve orientation, (3):268

Institute for Healthcare Improvement, (4):369

Instrument development, nursing care quality questionnaire, (3):220

Internet

effects of Internet-based intervention on plasma glucose in type 2 diabetes, (4):335

patient safety Web sites, (4):374

Intervention

effects of Internet-based intervention on plasma glucose in type 2 diabetes, (4):335

nurse-coordinated intervention for type 2 diabetes, (2):154

patient education and health-related quality of life, (4):307

J

Job satisfaction, work environment factors and retention of nurses, (3):283

Joint Commission International Center for Patient Safety, Web site for patient safety, (4):374

Joint Commission on Accreditation of Healthcare Organizations, unannounced JCAHO survey, (1):5

L

Leadership
- nursing homes' capacity to create and sustain improvement, (1):36
- nursing homes' capacity to create sustainable improvement, (3):203

Legal issues, tort reform, (1):9

Length of stay
- case management program for syncope, (2):140
- continuous lateral rotational therapy, (3):273
- preoperative state of mind and, (1):73
- quality management collaborative initiative, (2):174

Long-term care
- nursing homes' capacity to create and sustain improvement, (1):36
- power of relationship for high-quality long-term care, (2):103
- TigerPlace, (1):1

M

Malpractice, tort reform, (1):9

Mammography, rural African American women's descriptions of mammogram quality, (3):231

Medical errors
- looking beyond tort reform, (1):9

Medication errors, medication reconciliation in acute care, (2):95

Mental status, preoperative, postoperative complications and, (1):73

Minimum Data Set, admission to skilled nursing facilities from assisted living facilities, (1):16

Multidisciplinary care
- case management program for syncope, (2):140
- outcome-based multidisciplinary care planning tool, (2):145

N

Neurogenic bladder, intermittent catheterization, (4):302

Neuroscience intensive care unit, nurses' perceptions of open visiting hours, (2):182

Nosocomial infection
- pneumonia, continuous lateral rotational therapy, (3):273
- urinary tract infection, (2):134

Nursing home
- capacity to create and sustain improvement, (1):36
- capacity to create sustainable improvement, (3):203
- measuring quality of care, (4):293
- organizational culture, (4):341
- power of relationship for high-quality long-term care, (2):103

Nursing informatics, analysis of staffing effectiveness indicators, (3):215

Nursing practice
- care coordination for diabetes, (3):208
- intermittent catheterization in neurogenic bladder, (4):302
- medication reconciliation in acute care, (2):95
- nurse staffing and nosocomial urinary tract infection, (2):134
- occupational tuberculosis, (4):356
- pain management, (2):167
- patient safety, (3):193
- patient satisfaction with nursing care, (1):63
- using best evidence to change practice. *See* Evidence-based practice

Nursing shortage
- historical perspective: "If we only had a nurse," (2):190
- work environment factors and retention of nurses, (3):283

O

Observable Indicators of Nursing Home Care Quality Instrument, (4):293

Occupational health hazards, tuberculosis, (4):356

Organizational attributes, nursing homes' capacity to create and sustain improvement, (1):36

Organizational culture
- nursing home, (4):341
- nursing homes' capacity to create sustainable improvement, (3):203

Orientation, plan, do, study, act model, (3):268

Outcome-based care, outcome-based multidisciplinary care planning tool, (2):145

Outcomes
- continuous lateral rotational therapy, (3):273
- hospital readmission from a transitional care unit, (1):26
- improving wound care in home setting, (4):349

P

Pain management
- cancer pain, (3):261
- by direct care nurses, (2):167

Parent's perspective, priorities for improving pediatric care from parent's perspective, (1):43

Pathways, care planning, (2):145

Patient education
- effects of Internet-based intervention on plasma glucose in type 2 diabetes, (4):335
- health-related quality of life, (4):307

Patient safety
- fall risk assessment, prevention, and management, (2):107
- medication reconciliation in acute care, (2):95
